DOD PHARMACY OPERATIONS CENTER

DoD POC WebIntelligence Guide

Version 2.1

Last Update: 30 June 2005

TABLE OF CONTENTS

Section

1

Overview

Business Objects is a customizable, commercial off the shelf (COTS) Windows based software interface accessed through a secure website that allows the user to create ad-hoc reports on the data contained in the PDTS data warehouse.

The data warehouse contains all pharmacy transactions filled within the military health system (MHS) pharmacy-dispensing sites for DEERS eligible beneficiaries. MHS includes the MTFs, retail network, and mail-order pharmacies.

There are embedded links that provide additional information from:
- ❖ First Data Bank (FDB) file: drug data (brand/generic names, various drug classes, packaging, etc.)
- ❖ DEA provider file: providers who have valid DEA numbers
- ❖ NCPDP pharmacy file: information about the dispensing pharmacy (location)

Allows customized reporting so that you can monitor services and activities and assist you to:
- ❖ Tailor formularies
- ❖ Monitor compliance with DoD contracts
- ❖ Modify spending habits
- ❖ Recapture Workload
- ❖ Perform Drug Studies
- ❖ Assess Prescribing Habits
- ❖ Monitor Patient Compliance
- ❖ Monitor DUR Warnings

Types of Reports:
- ❖ Drug Studies: by specific NDCs, Therapeutic Class, Brand and Generic, etc.
- ❖ Area Studies → DoD, Point of Service (MTF, Retail, Mail Order), Region, State, Host, Site, Individual MTF, Catchment Area
- ❖ Comparison Cost Reports
- ❖ Utilization (by number of prescriptions, quantities, cost, and unique users)
- ❖ Date Ranges: year, month, week, day
- ❖ Patient and Provider Profiles
- ❖ DUR Studies: Level 1 Drug to Drug Interactions
- ❖ Data Integrity

Administrative Details:

A. **Passwords:** PW are not to be used by anyone other than you. If someone at your site needs access, then they need to contact the appropriate person and go through the training process.

If you do not use your access for 30 days, access will be disabled.

After 90 days of non-use, access will be terminated.

B. **PCSing:** Don't forget to let us know so that we have a current email and phone. Also, this will be the time to schedule a new individual to have training.

C. **Privacy Act:** Patient and provider information are covered under the Privacy Act and as such there must be a need to know basis to gather this information.

D. **HIPAA Compliance:** Information must be protected & stored securely. All Individuals who have access to PDTS Business Objects must have received HIPAA Training.   Note: If you email protected health information, you should send it encrypted.

E. **Proprietary Information:** cost information

        Prescription Cost (not all fields available to every access level)
                        Submitted Ingredient Cost (proprietary information)
            +   Submitted Dispensing Fee (proprietary information)
            +   Submitted Sales Tax
            -           Copay
            _____
            =   Total Submitted Amount Due

F. **Dissemination of Information:** In general, information gathered from PDTS is intended for internal use only and should not be disseminated. **Please send any outside inquires to the DoD POC.**

Standard Business Practices:

- Schedule reports Monday through Friday AFTER duty hours (1800 CST to 0800 CST).
- **Do not schedule reports between 0001 Saturday to 2400 Sunday (EST).** All reports should be completed by 0001 Saturday. The data warehouse is being updated during this at this time.
- Data is current as of prior week's Friday.
- Non-standard downtime will be announced via email. The Broadcast Agent Server will automatically reschedule reports as needed.
- There are fail safe time-outs if report run for excessively long time (> 40 hours)
- There is a 1,000,000 line-limit per report. If your report exceeds that limit you will see a partial report indicator, flashing triangle, on the lower portion of the screen.
- Pharmacy File: Updated monthly with file from National Council Prescription Drug Program (NCPDP).
- Provider File: Updated monthly with file from DEA & updated weekly from production environment
- Patient File: Updated weekly with information from production environment
- Drug File: Updated weekly with file from First Data Bank (FDB)

Dates to Remember:

Mail Order: 1 0ctober 2000
Retail: 1 April 2001
MTF: 1 July 2001 – For individual MTF activation dates by Host See Appendix A
TMOP: 1 March 2003
TRRX: 1 June 2004

Terminology:
Universe Objects Descriptions:
- ➢ **Claim Adhoc:** Information about all claims. This includes claims with status of paid, rejected, reversal, or reversed.
- ➢ **DUR Adhoc:** Information about only those claims that processed and show a prospective drug (PRODUR) edit or warning message (ie. TDs or DDIs).

Claim Status:
- **Paid (Active Prescriptions):** claims processed that are on are a patient's profile.
- **Reversal:** information sent to process the reversal of the paid transaction.
- **Reversed:** claims that were previously showing active on patient's profile but have been reversed.
- **Rejected:** claims that did not get processed because of data integrity issue such as missing or invalid (MI) prescriber ID, non-matching (NM) NDC number, or MI Cardholder ID.
- **Duplicate:** same transaction (NCPDP#, RX#, Date Filled, Refill Code) created twice on patient profile. Second transaction will show as the duplicate.

Example: RX# 1234 shows a reversal, a reversed transaction, and a paid claim.
➔ This transaction is currently paid (active). It was edited (sends reversal causing status change to reversed) & resubmitted (paid).

BCA: Broadcast Agent is the interface used to send reports to processing server.

Grouping Identifiers:

Service Category	Host	Site	Pharmacy	Chain	DMIS	NCPDP#
MTF	MACDILL	CLEARWATER USCG	CLEARWATER USCG PHCY	3HA	0422	1089172
MTF	MACDILL	MACDILL	MACDILL BX PICKUP PHCY	3HB	0045	1089386
MTF	MACDILL	MACDILL	MACDILL MAIN PHCY 6TH MDG	3HB	0045	1081520
MTF	MACDILL	MACDILL	MACDILL PHARMACARE CTR PHCY	3HB	0045	1087786
MTF	MOODY	MOODY	MOODY PHCY 347TH MDG	3JA	0050	1142784
MTF	PATRICK	PATRICK	PATRICK MAIN PHCY 45TH MDG	3MA	0046	1080465
MTF	PATRICK	PATRICK	PATRICK SATL PHCY	3MA	0046	1088118
Retail			Walgreens Pharmacy #852	326	0051	1147732
Mail Order			TMOP Pharmacy			1149778

Host & Site: A host is a network grouping of MTF sites. A site is an individual site for the MTF. Not applicable to retail and mail-order pharmacies.

Chain Codes: are codes created by PDTS/WebMD for the purpose of HOST clustering which is also a unique code for each site. (New Coast Guard sites do not follow this system). Retail chain codes are from NCPDP documentation. The mail order pharmacy does not have a chain code.

DMIS ID: a code created by DOD for reporting purposes.   PDTS uses to group zip codes for catchment area reports. The catchment area is a radius around a MTF pharmacy. For outpatient clinics the radius is 20 miles and for a hospital the radius is 40 miles.

NCPDP #: a unique number for each "distinct" pharmacy. Distinct means a unique and separate location. MTF pharmacies co-located in the same room could share a NCPDP#. These numbers are generated by NCPDP organization.

PCN #: a number that distinguishes what point of service a transaction is from and referred to as the Process Control Number.
> Current:
>> 770306 - MTF
>> 770404 - TMOP (not used prior to 1 Mar 03)
>> 770405 - TRRX (not used prior to 1 Jun 04)
> Previous:
>> 770392 - NMOP (not used after 15 Mar 03)
>> 770383 - Sierra (not used after 16 Jun 04)
>> 770382 - Humana region 2-5 (not used after 1 Aug 02)
>> 770384 - Humana region 2-3-4-5 (before 1 Aug 02 was Humana 3-4, not used after 16 Jun 04)
>> 770393 - Healthnet region 6-11 (not used after 16 Jun 04)
>> 770386 - Healthnet region 9-10-12 (not used after 16 Jun 04)
>> 770385 - Triwest (not used after 16 Jun 04)

Service Category: Grouping of pharmacies based on point of sale (MTF, Mail-Order, Retail)

Section

2

Initial Set-Up

Website Location: https://pecweb.med.osd.mil/
                         Note: Do not save password if prompted to do so.

3 Steps must be done to set up Business Objects:

1. Set Up options with Business Objects
2. Download Certificate (see page 14)
3. Install Java Applet (www.java.com)

Options Set-Up:

These options need to be set prior to running any reports.
- ▪ **Access the InfoView log-in page:**
  - o Go to website and click Blue Log In button and enter username & password
    - • Click the *Click here* link if you are a new user

Business Objects now opens with just one password which must meet standard password design using both upper and lower case letters, numbers and special characters. You will be prompted to change this password periodically.

- **If you're a new user the INFOVIEW Check Browser page appears.**

- Click the icon. The configuration settings for your browser will be displayed. Follow directions to check your browser against the supported browser list and if necessary, update your browser.

- Return to the INFOVIEW log-in page and enter Username and Password.

▪ **Home Page:** opens by default.
    <u>Access **Options** to define display and document viewing settings:</u>
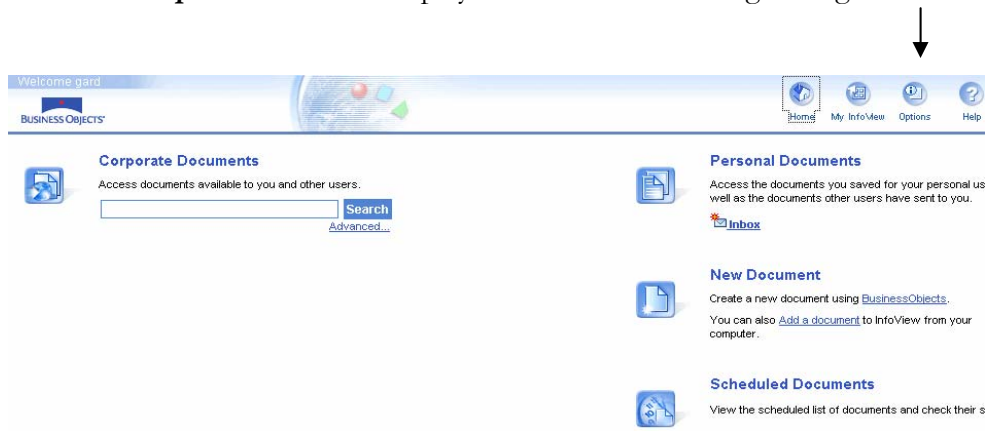

▪ **Options:**
    - Don't forget to click apply after changing settings
    - Display: Default Start Page/My InfoView (need to set)
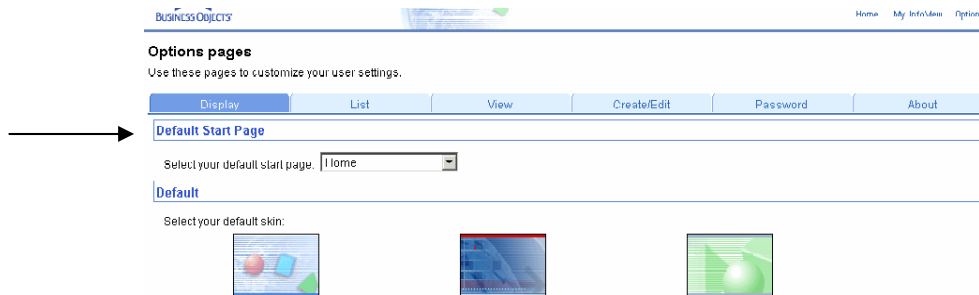

▪ **List:** Specify how you want to refresh your documents list.

- **View:** HTML format (Windows only)

- **Create/Edit:** WebIntelligence (Need to set)

- **Password:** Will allow you to change 2nd password only

The Home Page Menus:

> ### ➢ The INFOVIEW Toolbar:

The INFOVIEW Toolbar appears across all windows and does not change as you move through different pages with the menus. It contains links to the following pages:

- The **Home** page is the central page in INFOVIEW. Unless your system administrator has created a custom page, the **Home** page is the first page to open when you log into Business Objects.
- The **My INFOVIEW** is a page that you can customize to fit your own needs. By default, this page welcomes you to the product and gives you a brief introduction to INFOVIEW. You can customize this page so that it displays the important information you would like to see on a regular basis.
- The **Options** page allows you to choose all your INFOVIEW settings.
- The **Help page** has extensive context-sensitive help, which provides you with a detailed description of both INFOVIEW and the concepts behind it as well as complete instructions for using it.
- The **Logout** page allows you to log out of INFOVIEW.

> ### ➢ Page Contents:
- **Corporate Documents:** is a catalog of all the documents that you are allowed to access in the corporate repository. These documents have generally been published by other users and store templates developed by PDTS reports team.

- **Search:** for documents by name and by using other advanced features.

- **Personal Documents:** is a catalog of all the documents that you have chosen to save for your own personal use on the Business Objects server. These are not stored on your personal PC and can be accessed from anywhere you have Business Objects access.

- **Inbox Documents:** is a catalog of documents that other users have sent to you or reports that you have created and sent to broadcast agent that are ready to be retrieved.

- **New Documents:** allows you to create new documents.

- **Scheduled Documents:** view the scheduled list of documents and check their status.

➢ **Access Corporate Documents**

- From the INFOVIEW Home page, click the **Corporate Documents** link. The documents available to you are listed under **All Documents** and any categories that have been created to organize the documents.

- Sort the list by clicking on the column headings. The triangle ▲ next to the Name header allows you to toggle between ascending and descending alphabetical order.

➢ **Access your Personal Documents**

- Click **Personal Documents**. The documents are stored either in the **All Documents** category, or in any category that you may have created to organize the documents.
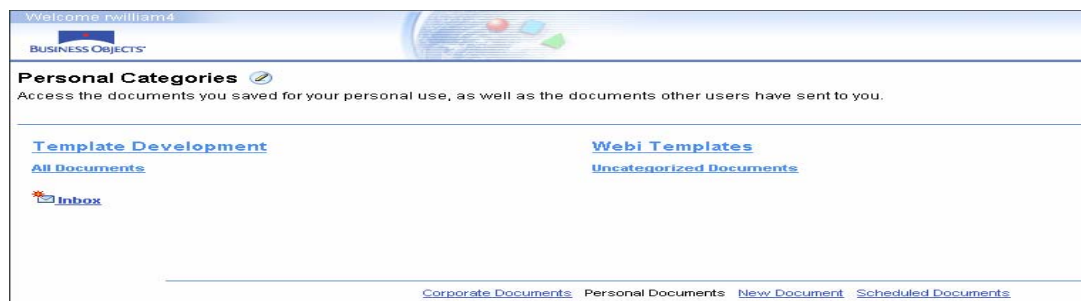

- To access a document, click the category that interests you and click on the document name. The document is displayed in the document pane. The last refresh date is displayed above the **Prompts** pane:

IF	Then
You want to refresh the report, to be sure you are viewing the most up-to-date information	Click 🔄
You want to close the report	Click ✖

➢ Access documents in your Inbox

- From the INFOVIEW Home page, click the   icon, located just under the *Personal Documents* link. The Inbox is displayed and will show all the completed reports sent to the Broadcast Agent and any reports that have been sent to you by other users.

- BOLD lettering identifies documents that you have not previously opened. Once you open the document, the envelope icon no longer appears. To open, click on the document name.

 DoD Root Certificate: This will need to be installed prior to running reports

1) Go to http://dodpki.c3pki.chamb.disa.mil

2) Select *Download Root CA Certificates*   3) Select *Download Class 3 Root CA Certificate*
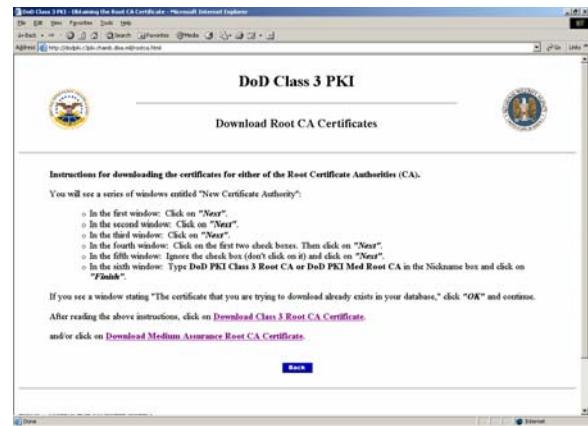

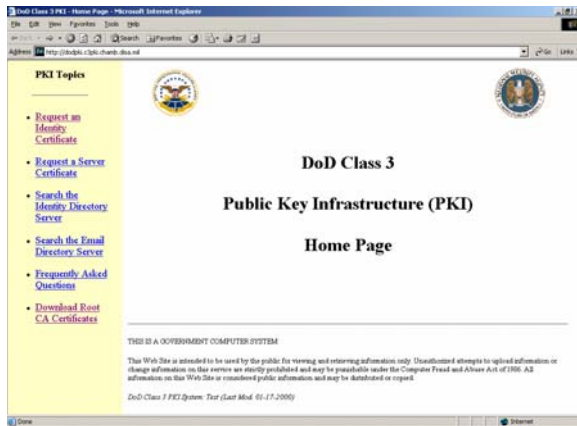

4) Click on *Save (Note save location so that you can navigate to the certificate in a future step).* File will be saved as dodroot.cer.

5) Click on save again.   6) Click on *Close*
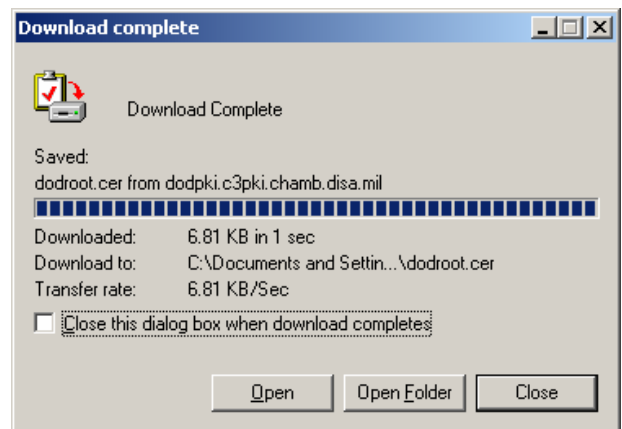

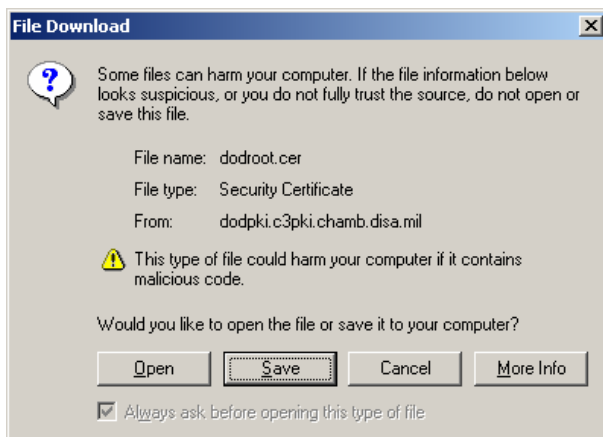

7) Go to *Tools, Internet Options*

8) Select *Content* tab and click on *Certificates*
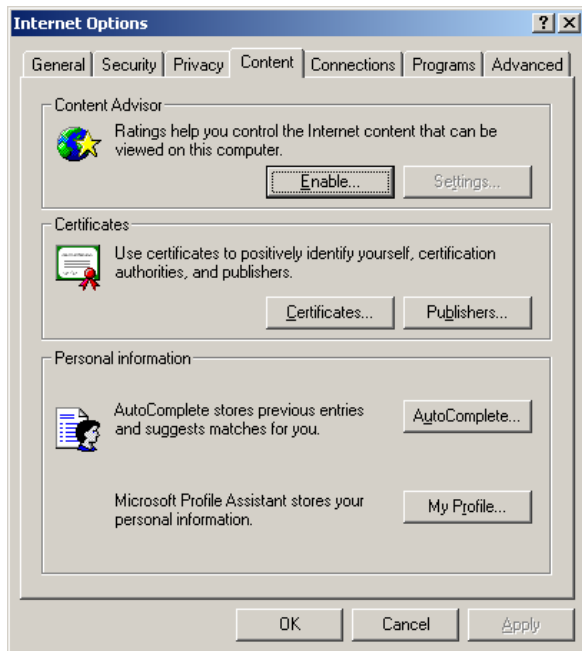

9) Select *Trusted Root Certification Authorities* and Click on *Import*
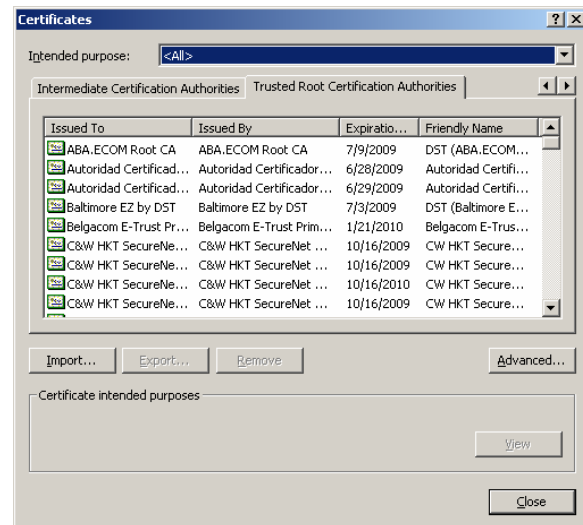

10) Click on *Next*

11) Click on *Browse* & Navigate to where file was save
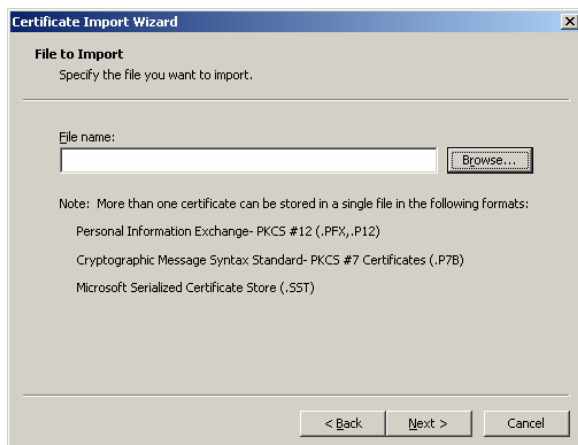

12) Change *Files of type* to *X.509 Certificate (*.cer,*.crt)* and Double click on file name *dodroot.cer*
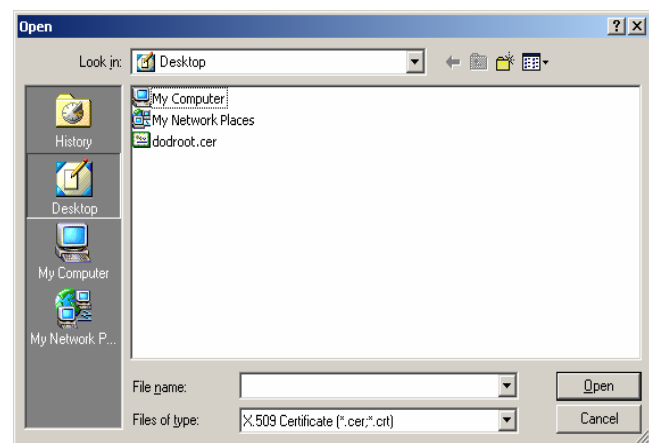

13) Click on *Next*

14) Click on *Next*

15) Click on *Finish*
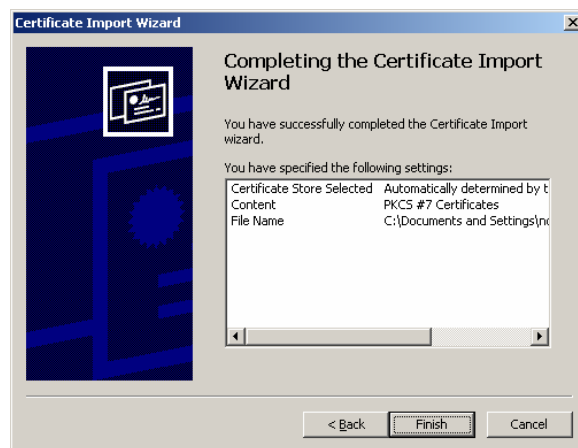

16) Click on *Yes*

Done!!

Section

3
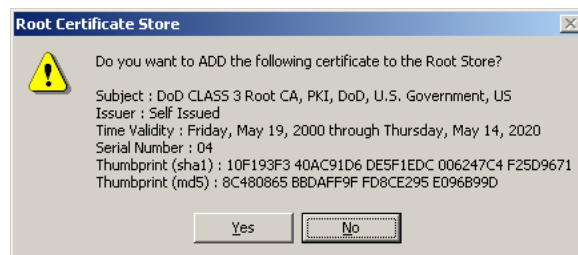

Classes and Objects Defined

List of Classes:

1. **Claim:** individual transaction information. Fields are locked at time of transaction. (updated weekly)

2. **Pharmacy:** pharmacy information from the NCPDP file. (updated monthly)

3. **Provider:** combination of providers IDs submitted and DEA File. (updated monthly)

4. **Patient:** combination of patient information submitted matched to DEERS demographics. (updated weekly)

5. **Drug:** combination of NDC submitted matched to FDB file. (updated weekly)

6. **Measures:** fields that will re-calculate based on objects in report.

7. **Date Summaries:** fields to summarize based on fiscal year or calendar year and date dispensed or calendar year date dispensed.

8. **Patient DMIS:** fields used to calculate mail-order catchment data.

9. **Pharmacy DMIS:** fields used to calculate retail catchment data.

10. **Service:** Branch of Service for the MTF pharmacy and Service Commands of each Service

Claim File:

Date Written: Date prescription entered into pharmacy system
Date Dispensed: Date prescription was filled or refilled
Date Processed: Date prescription was added on PDTS database

Claim Status:
- **Paid (Active Prescriptions):** claims processed that are on are a patient's profile.
- **Reversal:** information sent to process the reversal of the paid transaction.
- **Reversed:** claims that were previously showing active on patient's profile but have been reversed.
- **Rejected:** claims that did not get processed because of data integrity issue such as missing or invalid (MI) prescriber ID, non-matching (NM) NDC number, or MI Cardholder ID.
- **Duplicate:** same transaction (NCPDP#, RX#, Date Filled, Refill Code) created twice on patient profile. Second transaction will show as the duplicate.

RX#: For MTFs this is the PDTS prescription number, not CHCS prescription number. For retail and mail-order it is their system generated number.

Quantity Dispensed: sent from site's system as the Metric Quantity
Days Supply: Sent from site's system

PCN#: a number that distinguishes what point of service prescription is from.
PCN Description: name associated with number

>   770306 – MTF
>   770392 – NMOP (not used after 15 Mar 03)
>   770404 – TMOP (not used prior to 1 Mar 03)
>   770405 -- TRRX (not used prior to 1 Jun 04)
>   770383 – Sierra (not used after 16 Jun 04)
>   770382 – Humana region 2-5 (not used after 1 Aug 02)
>   770384 – Humana region 2-3-4-5 (before 1 Aug 02 was Humana 3-4, not used after 16 Jun 04)
>   770393 – Healthnet region 6-11 (not used after 16 Jun 04)
>   770386 – Healthnet region 9-10-12 (not used after 16 Jun 04)
>   770385 – Triwest (not used after 16 Jun 04)

Generic Indicator: Prior to Jan 03, Codes M & X do not appear

>   Y = Generic
>   O = Originator, generic equivalents available
>   M = Multi-source, generic equivalents unavailable
>   N = Single-source, generic equivalents unavailable
>   X = Non-drug item, e.g. medical supplies

DUR Interact Code: M0 for prescriber, R0 for pharmacist

DUR Outcome Code: code for acceptance/override

1A Filled as Is, False Positive	1D Filled with Different Direction	1G Filled with Prescriber Approval
1B Filled as Is	1E Filled with Different Drug	2A Prescription not filled
1C Filled with Different Dose	1F Filled with Different Quantity	2B Prescription not filled, Directions Clarified

New/Refill Code: 00 is new; 01-99 is refill number
New/Refill: N is for New, R is for Refill

Compound Code: Legal status in CHCS is set to compound OR multiple NDCs in ADN file.

Service Category (Claim): Dimension that determines the service category based on the submitted PCN.

DAW: Dispense as Written
    0 = No Product Selection Indicated
    1 = Substitution not allowed by prescriber
    2 = Substitution Allowed, patient requested product dispensed
    3 = Substitution Allowed, pharmacist selected product dispensed
    4 = Substitution Allowed, generic not in stock
    5 = Substitution Allowed, brand drug dispensed as a generic
    6 = Override
    7 = Substitution not allowed – Brand drug mandated by law
    8 = substitution allowed – generic drug not available in marketplace
    9 = Other

Reject code: reason for rejection (if you need a list please contact one of the POCs at PDTS)

Authorization Number: Unique ID for every transaction. Used internally for claims processing.

Original Authorization Number: Used internally for claims processing of reversals.

Provider ID: provider's identification that is SSN, license number, or DEA number.

NDC: sent from site's system

Pharmacy ID: NCPDP# of pharmacy which processed claim

Agestratdescription (predefined): The group the age falls into at time prescription is filled.

Ages 0-4	Ages 15-17	Ages 25- 34	Ages 45 –64
Ages 5-14	Ages 18-24	Ages 35 –44	Age 65+

Age 65(pre/post): Only two age categories – under 65 or Over 65. Transactions grouped based patient's age at the time prescription is filled.

Zip Code: Patient's zip code at the time transaction of dispensing.

Claim Region: Region associated with transaction at time of dispensing.

> ➤ Based on patient's zip code if transaction is from Mail Order.
> ➤ Based on pharmacy's zip code if transaction is from Retail.
> ➤ Based on chain code if transaction is from MTF

If the zip code is invalid, the region will not be recognized and will be blank.

Region Names:

Previous Regions:

Region 1 – Northeast	Region 5 – Heartland	Region 10 – Golden Gate
Region 2 – Mid-Atlantic	Region 6 – Southwest	Region 11 – Northwest
Region 3 – Southeast	Region 7/8 – Central	Pacific
Region 4 – Gulfsouth	Region 9 – Southern California	Europe

After November 2004 only three regions in CONUS North (1, 2, and 5), South (3, 4, and 6) and West (7/8, 9, 10, 11 and 12 (Hawaii))

Current Regions:

Region - North
Region - South
Region - West
Pacific
Europe

CONUS Region Map

Pharmacy File:

Chain Codes: are codes created by PDTS/WebMD for the purpose of HOST clustering. There is a unique number for each site. (New Coast Guard sites do not follow this system)
Example: 0AB   0 = Region   A= Host   B= Site

Chain Name: for MTFs this is the region name.

NCPDP #: a unique number for each "distinct" pharmacy. Distinct means a unique and separate location. Pharmacies can share NCPDP numbers if they are co-located in the same room.

MTF Host and Site MTF: Data only when pulling from Service Category is MTF

Region: based on location of the pharmacy
- ➤ If Retail the region is based on pharmacy zip code.
- ➤ If MTF the region is based on chain code.
- ➤ If Mail-Order the region is blank.

Branch of Service: Air Force, Army, Coast Guard, and Navy of the pharmacy.

Zip Code: of pharmacy from NCPDP file.

Provider file:

Name: provider name will be "Not on file" if a social security number or license number.

Provider ID: provider identification (DEA#, SSN, or License#)

Details (Address, City, State, Zip) will only be available if the provider ID is a valid DEA#.

Patient File:

 DEERS ID: contains DEERS ID if known at the time the record was populated or if DEERS ID is unknown, it contains sponsor's SSN with FMP and "A" suffix.

SSN: Patient's social security number.

Member Number: either Sponsor's SSN with FMP or DEERS ID. This is the ID that was submitted with the transaction.

Age: current age bracket that patient falls into
Current Age: Age of the patient at the time the report is ran.

Zip Code: zip code as of the last transaction at the time of the database load.

Drug File:

Drug/Strength/Form: grouping of generic name, strength, and dosage form

GCN#: code for grouping by drug, strength, and dosage form regardless of manufacturer

GCN sequence number: Code for grouping by drug, strength, dosage, and route

HICL sequence: grouping by ingredient regardless of strength

Route: description of route
Route of Administration: 2-digit code for route of administration
Dosage Form: Description of Form
Form: 2-digit code for dosage form

Route	Rt. of Admin	Form	Dosage Form
OPHTHALMIC	OP	SA	SOLUTION
OPHTHALMIC	OP	SN	DROPS SUSP
OPHTHALMIC	OP	SO	DROPS
OPHTHALMIC	OP	SW	IRRIG SOLN

AHFS: code for AHFS therapeutic class
AHFS Description: description of AHFS therapeutic class

GC1: code for grouping by system affected
GC1 Description: description of grouping
GC3: code for grouping by GC3 therapeutic class
GC3 Description: description of grouping
GC4: code for Ingredient within Therapeutic Class (no description available)

Orange Book Code: Therapeutic Equivalence Code

DEA Class: Schedule (0, 2, 3, 4, 5) that medication falls into

OTC Indicator: Yes or No
Maintenance Drug: Yes or No

AWP Unit Price: Average Wholesale Price
MAC Unit Price: Maximum Allowable Cost
WAC Price: Wholesale Average Cost

Obsolete Date: The obsolete is the date supplied to First Data Bank by the manufacturer stating the last date of production on the product represented by the NDC. However, even if a product is no longer being produced, there may still be product being shipped and in use in the marketplace.

GCN Codes:

GC1: By System

GC1 Code	Description
A	CARDIOVASCULAR SYSTEM
B	RESPIRATORY SYSTEM
C	ELECTROLYTE BALANCE/METABOLISM/NUTRITION
D	BILIARY SYSTEM/GASTRO-INTESTINAL SYSTEM

GC2: By Effect on System (Not in Business Objects)

GC2 Code	Description
A1	CARDIAC STIMULANTS
A2	CARDIAC DEPRESSANTS
A4	HYPOTENSIVES
A6	CARDIOVASCULAR DIAGNOSTIC AGENTS

*GC3: By Therapeutic Class

GC3 Code	Description
A1A	DIGITALIS GLYCOSIDES
A1B	XANTHINES
A1C	INOTROPIC DRUGS

GC4: By Ingredient within Therapeutic Class

GC4 Code	Description
A1AA	DIGITALIS LEAF
A1AB	GITALIN
A1AC	DIGITOXIN
A1AD	DIGOXIN

*GCN: By Drug, Strength, and Dosage form

GCN Code	Description	Strength Desc	Dose Form Desc	Route Admin Desc
32180	IBUPROFEN	5%	CREAM(GM)	TOPICAL
35430	IBUPROFEN	400MG	CAPSULE SA	ORAL
35431	IBUPROFEN	200MG	CAPSULE	ORAL
35432	IBUPROFEN	300MG	CAPSULE	ORAL
35433	IBUPROFEN	400MG	CAPSULE	ORAL

GCN Sequence Number:
Alternative 6–digit number by Drug, Strength, Dosage, and Route

Measures: Pre-defined quantitative fields.

Total Submitted Amount Due:
>   Submitted Ingredient Cost (proprietary information)
>   + Submitted Dispensing Fee (proprietary information)
>   + Submitted Sales Tax
>   – Submitted Copay

 # Of Utilizers: Count of unique users at the lowest level of report.

If you remove a level and have the Unique Utilizers (UU) field, the report will not recalculate UU accurately. To get an accurate count of UU, run report at each level you need the UU count.

>   Example: Report ran has fields of Site, Phcy Name, #RX, # of Utilizers

>   If you modify the report in BO and take out phcy name field so that you can have totals by Site, # of Utilizers will not recalculate accurately. BO will to add all the # of unique utilizers from each pharmacy and attribute to the site. This will not be accurate for the site since you can have the same user go to multiple pharmacies.

>   That person is unique to each pharmacy (visits 3 pharmacies, counted unique 3 different times if based on phcy name) and unique to the site (3 pharmacies, should be counted only one time if based on site). This report will need to be run once for site level and once for pharmacy level to get an accurate count.

Patient DMIS: a 4-digit number identifying a catchment area based on the patients' zip code in the claim file. Use this DMIS Code when you are collecting Mail-Order data for that catchment area.
You will need to choose both the DMIS Code and the service category "Mail-Order" in the conditions frame or the report will not pull accurate data.

Pharmacy DMIS: a 4-digit number identifying a catchment area based on the pharmacy zip code in the pharmacy file. Use this DMIS Code when you are collecting MTF and/or Retail data for that catchment area.
You will need to choose both the DMIS Code and the service category "Retail" in the conditions frame or the report will not pull accurate data.

Service: These dimensions apply to MTF data only based on who owns the pharmacy
Branch of Service: Defines the site as an Air Force, Army, Coast Guard or Navy pharmacy or MTF
Service Commands: Assigns MTFs to the Command structure of each Service: Air Force – Major Commands, Army – Regional Medical Commands, Coast Guard – Maintenance and Logistics Commands and Navy – Health Service Offices.

Creating Reports

Creating a New Report

A new report is started by selecting the "New Document" option found on the Home page or the tool bar under Personal Documents or Corporate Documents. Below is a sample of the Home page access.

> 1. Select the New Document bold-face or select the icon that is left of the bold-face.
> 2. You can also start a new document by selecting New Document from the bottom tool bar right below the line that breaks the lower portion of the page.
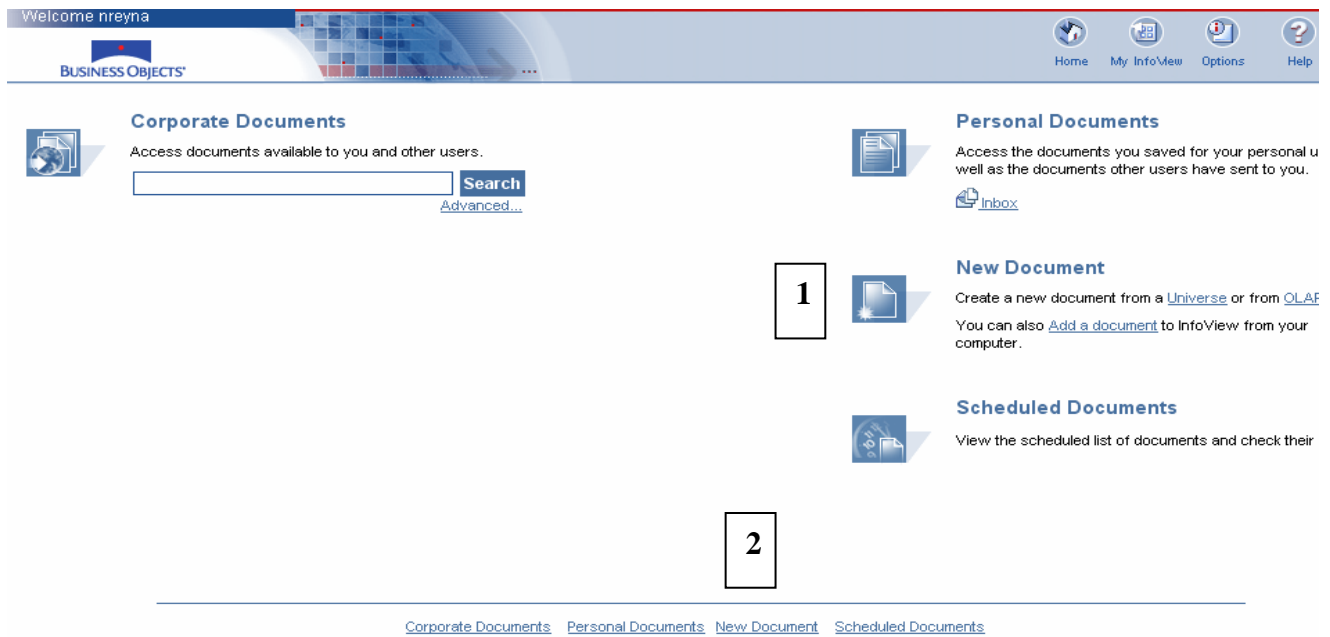

Once you have selected "New Document" the Universe selection screen is the next screen that comes up. From this screen you select which of your available universe's you wish to pull data from.

Most users will have access to two universes, the Claim Adhoc or the DUR Adhoc.

          Claim: information about all claims that processed as paid, rejected, reversal or reversed.

          DUR: information about only those claims that processed and show a prospective drug utilization review (PRODUR) warning messages.
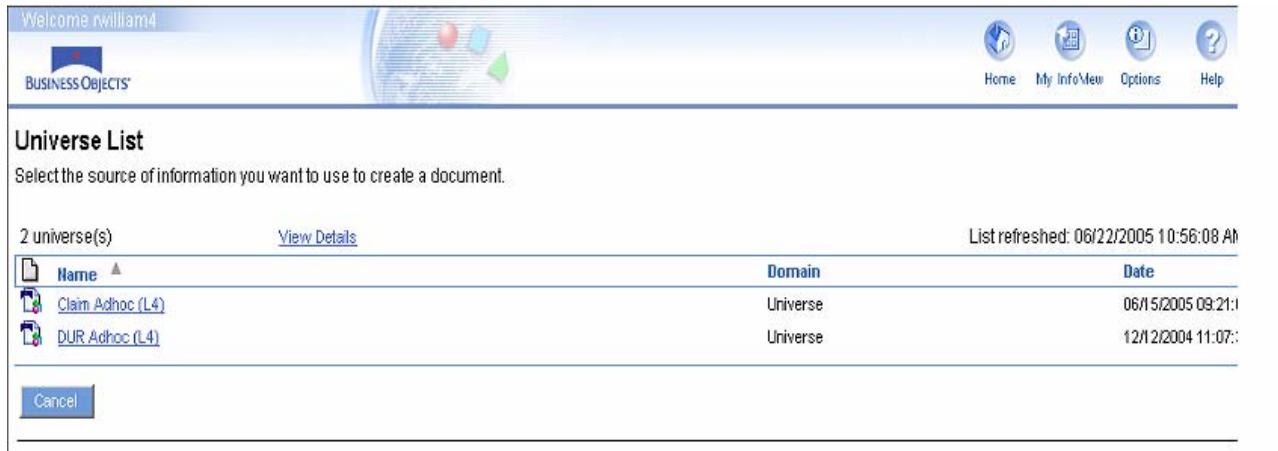

Selecting one of these two universes will activate the WebIntelligence Java Report Panel containing the query panel from witch all reports are built.

Query Panel:

The Edit Query panel opens first, showing the objects and classes available in the selected universe.
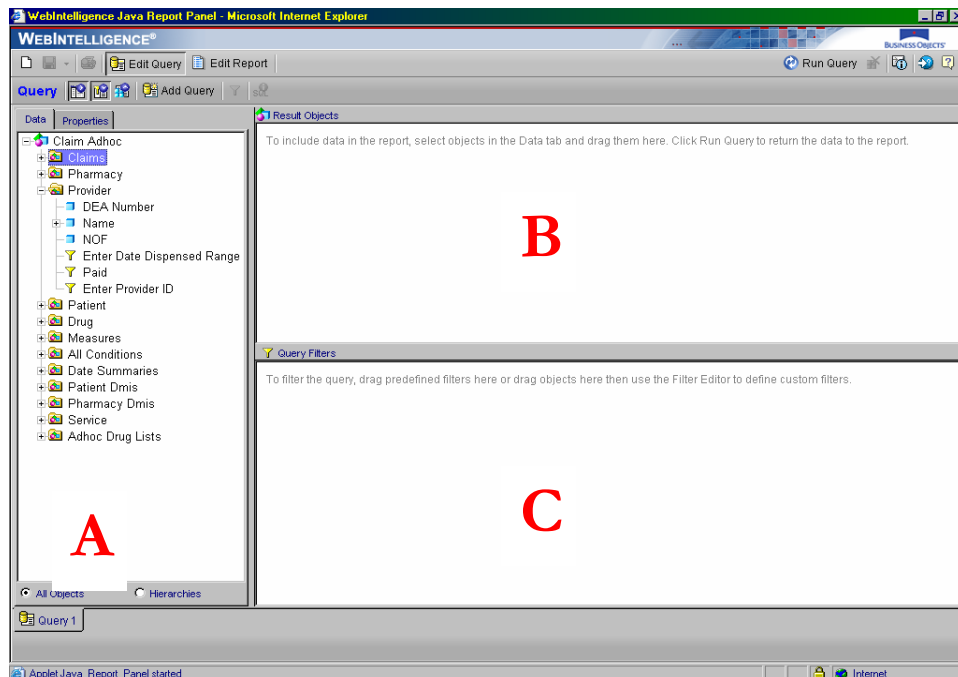

A. **Building Blocks (left):** Elements available to build report

Dimension object

Class (folder): group of related or like objects
Objects: elements that map to a set of data on the data warehouse
       3 categories of objects
           Dimension (blue box): basic data that will be basis of analysis

Detail object

           Detail (green diamond): an additional piece of information about a
           specific dimension.
           Measure (pink circle): numeric data that is a result of calculations

Measure object
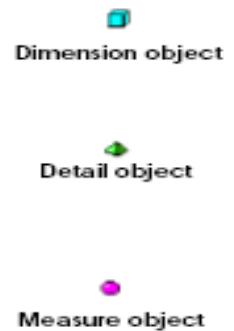

B. **Results Pane (top):** What do you want to see in your report?

   ❖ Number of Rx's?
   ❖ Quantity Dispensed?
   ❖ Sites where prescription filled?

C. **Conditions-Query Filters (bottom):** What data set do you want to pull your data from?

   ❖ Always set timeframe
   ❖ Always set PAID claims (ignores reversals and rejects)
   ❖ Specify more conditions (refills, by provider, by pharmacy, etc.)

Moving Objects to results pane:

- Click an icon in the Classes and Objects list, and drag it to the Result Objects box.
- Double-click an object in the Classes and Objects list.
- Click a class folder and drag it to the Result Objects box. All the objects in the class appear in the Result Objects box.

Removing objects from results pane:

- Drag the icon to the Classes and Objects list.
- Highlight & press the delete key.
  Right Click the mouse button, then selecting the Delete command on the pop-up menu.

Creating Conditions:

- **Predefined Conditions:** Conditions that have already been created.

  o In Class/Objects panel (A) the conditions are under the objects for pulling in the report. An example is show in the diagram above. The conditions are those preceded by the yellow funnel.

o Conditions are grouped by the classes to which they are related. Some conditions may appear more than once.

Enter conditions: prompt you to enter free-text values
→ Enter Date Dispensed Range
→ Enter GC3
Note: To enter multiple values, use semi-colon as separator
Example – value; value; value; etc.

Select conditions: prompt you to pick from a list of values
→ Select Service Category
Note: To select multiple values, use control key & highlight each value

Statement conditions: will not prompt you additional values
→ PAID

- **Custom Conditions:** conditions that you apply by selecting from the object list

  o **Three steps to creating a custom condition**

    i. Drag an Object to the conditions panel
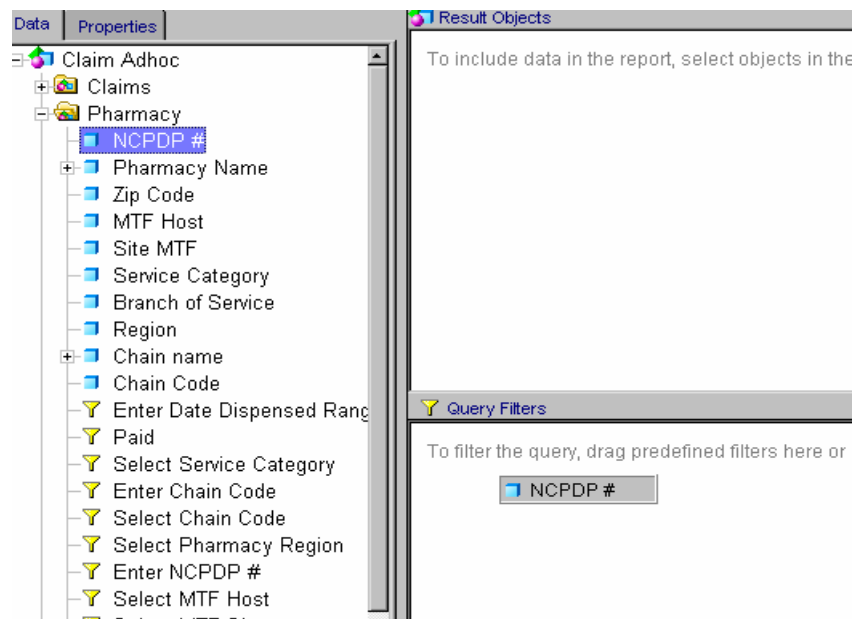

ii. Select an operator from the list of options by opening the drop down box

Operator Options:

Equal to   a value (cannot be multiple values)
Different from   a value (cannot be multiple values)
In list   are equal to one of the values specified in the list.
Not in list   are different from all the values specified in the list.

When "In list" or "Not in list" is selected you will get a different box that shows up. Here you enter each value in the "Type a value" box. After entering your value select the double right arrow (>>) to add it to the list.

Is not null   cell contains a value.
Is null   cell does not contain a value.
Matches pattern   has same pattern as a specified character string; the character string can contain a wildcard.
Different from pattern has a different pattern from a specified character string; can contain a wildcard.

    iii. Select an Operand

Filtered Object
⬜ GCN #

Operator
| In list | ▼ |

Operand Type
⦿ Constant
○ Value(s) from list
○ Prompt

Operand Type – Use feature to: (constant) build your own value to search, (Value(s) from list) pick your value from a list of all possible values for that dimension, or (Prompt) prompt user to enter a value when sending to Broadcast Agent.

Wildcards:
To be used with Matches pattern or Different from pattern operators only.

(%) The percent sign can replace several characters.
For example: N% returns all values beginning with an N (New York, Nevada, etc.).

(_) The underscore can only replace a single character
For example: GR_VE returns Grave, Grove, Greve, etc.

Multiple Conditions:

    a. AND signifies that both conditions MUST be met
    b. OR signifies that either of the conditions can be met, but at least one condition must be met.
        → To change from AND to OR, double click on the "AND" and vice versa

Query Filters

▽ Enter Date Dispensed
▽ Paid
And
    Or
      ⬜ Drug.NDC Equal to: 000000015487
      ⬜ GCN # Equal to: 45678

Grouping:
You can group the conditions to provide more specific results.
To group or ungroup, drag the specific filter on top of the filter in which you want to group it with.
To remove the grouping, drag the specific filter to the "And"/"Or" that is first or farthest left.

Saving, Running, & Retrieving
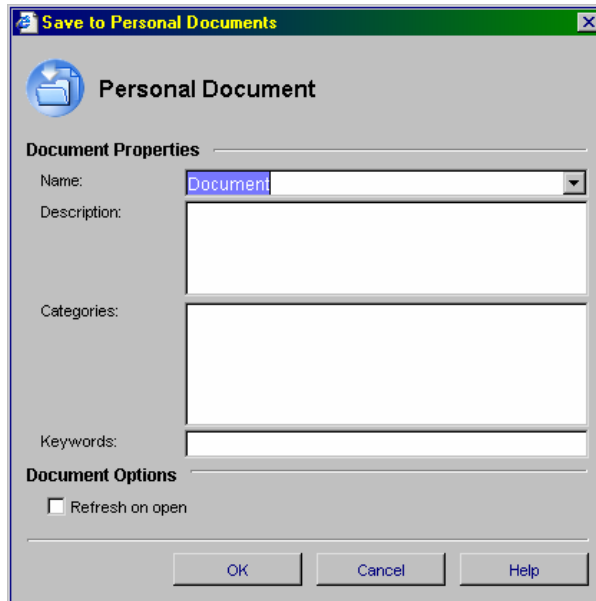

Saving Report template:

After building your report in the Query panel you must select "Edit Report". This will take you to a new page that will show you what the report will look like. The initial screen shows the report structure. Click on "View Results" to see the actual report format.
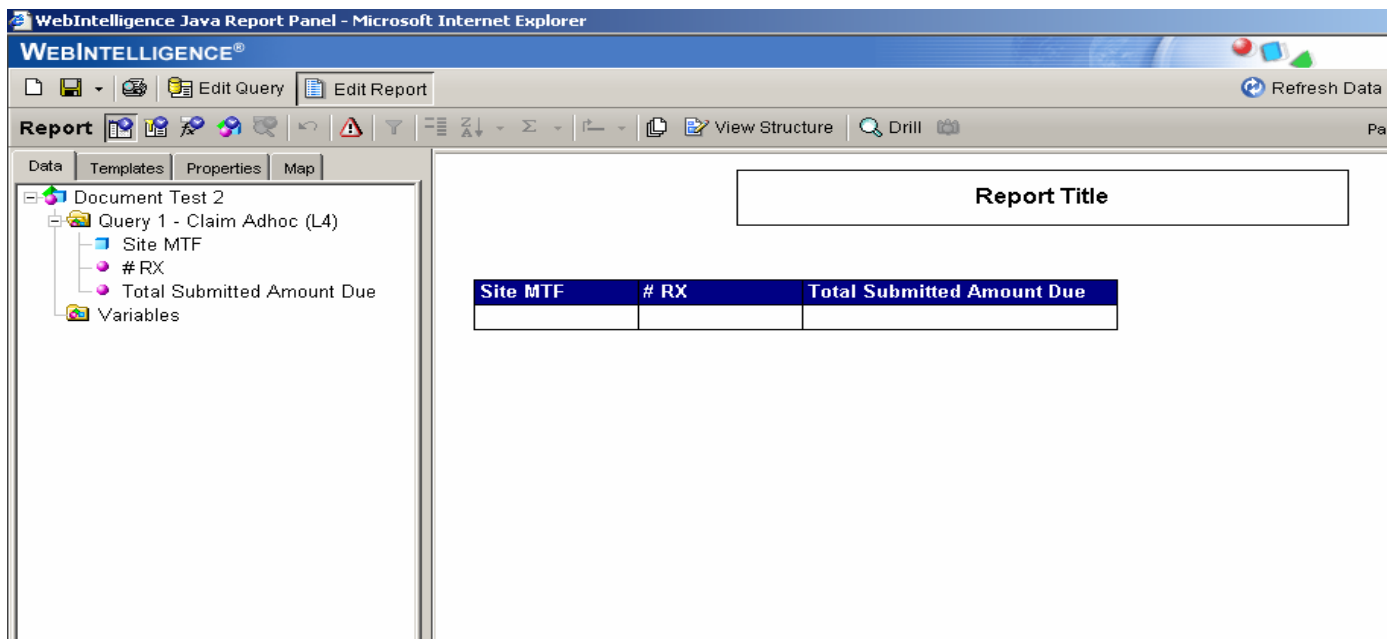

When you get to this screen you must then save the report by clicking on the disk show in the upper left corner in the above figures. This will allow you to save the report as a personal document.

Select this option and it will bring up this dialog box. Here you name your report to best represent what you are reporting on. Click OK and the report will be saved to your Personal Document folder.
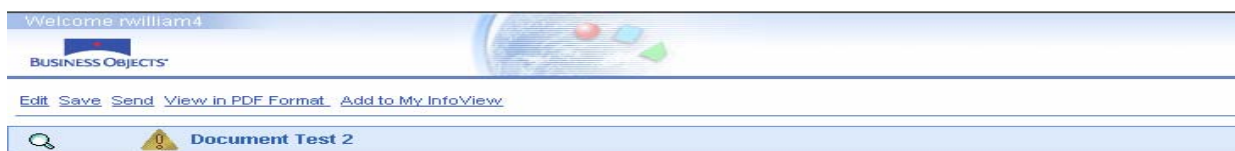

At this point you have a "blank" report with a specified query. You now need to run the report to obtain the desired data.

Running Reports:

You have two options in running reports. Refresh Data runs the report interactively and ties up your computer until the report is completed. This option is not recommended. The second option is to send the report to a Broadcast Agent. This is the preferred method as it allows you run the report at a specific time without tying up your computer.

Sending Report to Broadcast Agent:
1. Retrieve your report from your Personal Document folder.

2. Click on the "Send" in the tool bar in the top left corner of the report (see figure above) and the screen shown below will appear.

3. Click on "Scheduled Refresh" from the Refresh options and that will bring up the screen below. Select yourself by typing in your first initial and first few letters of your last name then click Search. Highlight your name if there are more than one and click the Add button.

4. Click on "Scheduled Refresh" and the following screen appears. Change the Frequency to Once

5. This brings up the option to schedule the report to run at a later date by changing the date and times shown and then clicking on "**Set BCA Prompt**"

6. After you click on Set BCA Prompt, all conditions (filters) in the report that require an action to Enter or Select will appear and you will need to complete the action by entering or selecting the appropriate response. Then click on the "Run Query" button.

7. Finally, click OK and the report will be sent to the Broadcast Agent and will run when scheduled. The completed will appear in your Inbox.

Retrieving Reports:

Once a report has completed, its header title will appear in the Inbox. Click on the header title and the report will start the retrieval process. Retrieving a report from the Personal Document or Corporate Document folder is handled in the same way, clicking on the header title.

Saving Report a taken from the Inbox:

When you open a report from the Inbox it will **NOT** automatically over-ride the existing report that has been saved in your Personal Documents folder. You must take that action by clicking on "Save" and selecting "Save as a personal document".
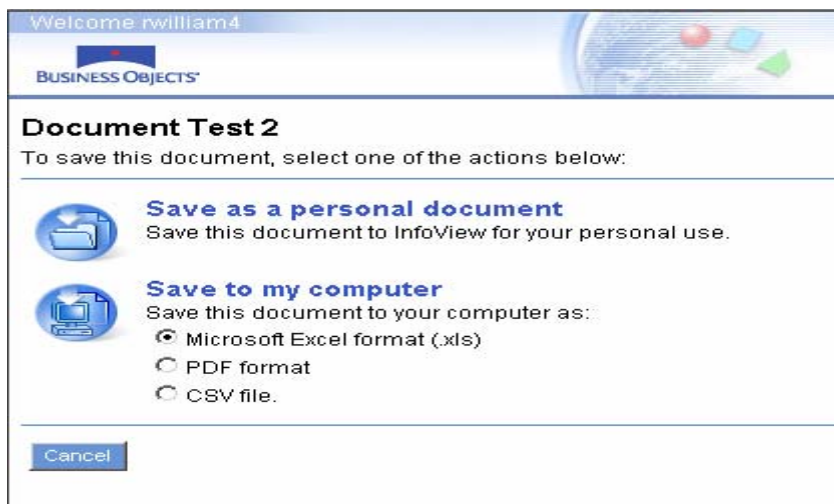

You over-ride the previous version of the report by selecting the Yes button where it says **Overwrite**.
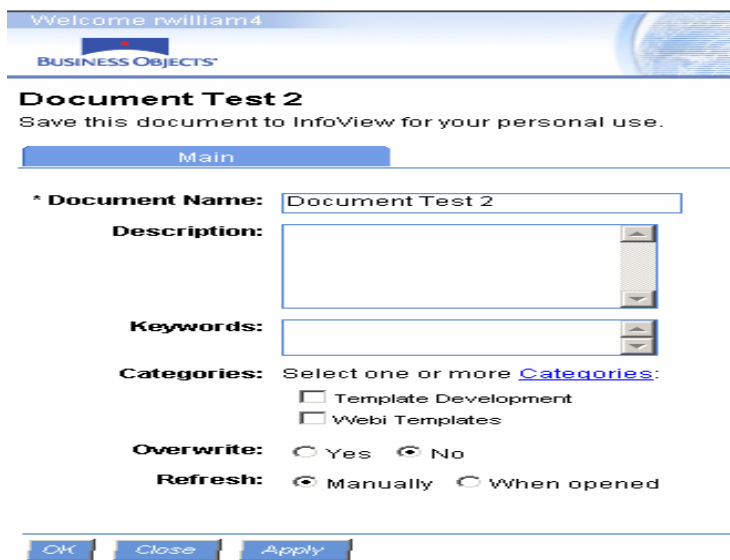

There are 3 ways to save a report with data:
1. To personal documents (kept on server): as shown above
2. To Corporate documents: if you are given this permission it is a way to share your report with any user who has access your level of Business Objects.
3. Version 6.5 Business Objects allows you to save report in multiple types of formats –Microsoft **Excel, PDF** format and a **CSV** file.

   For import into Excel: *formats/graphics do not transfer, only data transfers. Row capacity in Excel is approximately 65,000 lines, any additional lines will be deleted.*
   For use in Excel save report as a CSV file (*.csv* extension)
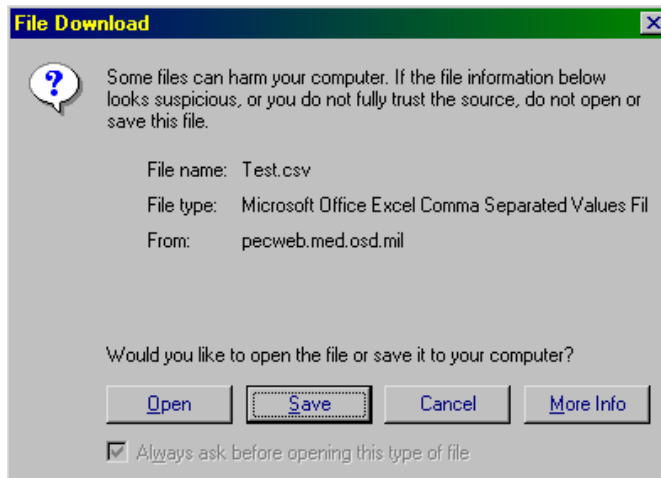

When you select CSV in the save screen click the computer icon next to save on my computer. When you have done this the box to the left will come up on the screen. The best route is to click save and find an appropriate place on your computer to save the file.

Notes:
If the report you ran includes "Unique Utilizers" as a dimension, the .CSV file will repeat your report title header and Unique Utilizer data below your initial data. because of the way Business objects runs its internal report to pull "Unique Utilizers"
Multiple reports will be shown in one CSV file. Meaning if your report contains multiple tabs each tab will be included in one CSV file rather than a CSV file for each tab.

Importing .csv file in Excel:
   In a blank Excel worksheet, open the .CSV file, which will bring up an import wizard
   - Data
   - Import External Data
   - Import Data
   - Highlight file you want to open
   - Double Click highlighted file or while file is highlighted click open

Import Wizard:
- Step 1: delimited (always)
- Step 2: comma (have to select, default is tab)
- Step 3: change any columns that could have leading zeros (i.e. NDC, SSN) to text field or leading zeros will be dropped

  Step 4: Once open, manipulate report to display data to your preference, Then re-save as excel file.

Resending report:

To update a previously created report, open the report from your personal documents page.
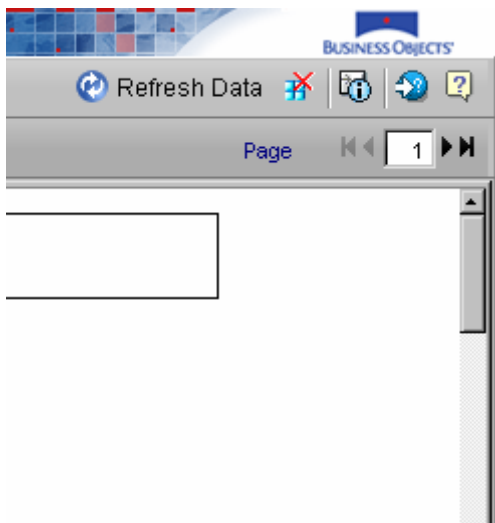

If report contains data, it is best to purge document and then resend. To purge document, click on edit which will take you to your report query. From there select the icon to purge data witch is shown to the right with the red X on it.. You can also edit any data in the report if you wish to see new data or in a different way.

After completing this process save the report in the query page. When your report comes back on the screen close it and re-open the report from your Personal Documents and your clean report will be shown with any edits you may have made. Re-send the report and you will have your newer data.

View Reports Scheduled:

Click Scheduled Documents in home page. This will show list of documents currently scheduled.

Section

6

Toolbars

There are additional toolbars that are very helpful when working with reports.

1. **WebIntlligence Toolbar:**

2. **Query Toolbar:**

1 **Show/Hide Manager** – show or hide the **Query Manager**. The Query Manager displays the **Data** tab, with the objects and hierarchies available on the selected universe. It also displays the **Properties** tab, where you can set properties for the query, such as limiting the query size and setting security restrictions.

2 **Show/Hide Filter Pane** – show or hide the **Query Filters Pane** below the **Result Objects Pane**. You add filters on the query by dragging predefined filters or objects here. When you drag objects to the Query Filters Pane the **Filter Editor** appears so you can define the filter operator and operand.

3 **Show/Hide Scope of Analysis Pane** – show or hide the Scope of Analysis pane where you define how many levels of data you want to include behind the values displayed in the reports. Including a scope of analysis enables you to drill down on displayed values to analyze more detailed data.

4 **Add Query** – insert an additional query into the document. You can define multiple queries on one or multiple universes.

5 **Add Quick Filter** – this button is activated if you select an object displayed on the **Result Objects Pane**. Clicking the **Add Quick Filter** button displays the list of values associated with the selected object. You can select one or multiple values to define a filter. The filter appears on the **Query Filters Pane**.

6 **View SQL** – launches the **SQL Viewer**. The viewer displays the SQL generated by WebIntelligence for the query.

3. **Report Toolbar:**

1. **Show/Hide Manager** – show or hide the **Report Manager** in the left frame of the Java Report Panel. The Report Manager displays the **Data**, **Properties**, **Templates**, and **Map** tabs. You use these four tabs to define the formatting and properties of the reports, as well as the properties of the entire document. (Note: the Map tab only appears in **Results View**, see 13.)

2. **Show/Hide Filter Pane** – show or hide the **Report Filters Pane**. You add filters on the report by dragging objects here from the **Data** tab. When you drag objects to the Report Filters Pane the **Filter Editor** appears so you can define the filter, .operator and value(s).

3. **Show/Hide Formula Toolbar** – show or hide the **Formula Toolbar** where you can type custom formulas to add them to report cells. You can also create formulas using the **Formula Editor**, which provides a graphical interface for creating formulas.

4. **Show/Hide Variable Editor** – show or hide the **Variable Editor**, where you can create custom formulas using a graphical interface and save formulas as variables for re-use on different reports in the same document.

5. **Show/Hide Drill Toolbar** – this button is activated when you start Drill mode (see 13). During drill analysis, you can drag objects onto the Drill toolbar to create list boxes that display the values for each object. You can select values to filter the objects you are analyzing.

6. **Undo** – allows you to cancel the previous formatting modification. (Note: you cannot undo changes to the query definition or undo refresh.)

7. **Alerters** – allows you to create, modify, or apply alerters to report cells. Alerters activate conditional formatting on report cells where results meet the conditions you specify.

8. **Add Quick Filter** – this button is activated if you select an object on the **Result Objects Pane**. Clicking the **Add Quick Filter** button displays the list of values associated with the selected object. You can select one or multiple values to define a filter on the object, and apply the filter to a selected report, block, or section. The filter appears on the **Report Filters Pane**.

9. **Insert/Remove Break** – insert or remove a break on a table column or row.

10a. **Insert/Remove Sort** – inserts or removes a sort on a table.

10b. **Ascending/Descending** sort options – allows you to specify the sort order.

11a   Insert Sum – inserts a sum calculation for the selected row or column.

11b   Insert Calculation – displays the list of standard predefined calculations you can insert for the selected row or column. Each calculation is inserted in a new footer.

12a   Insert Row Above – inserts a new table row above the selected row.

12b   Insert Row/Column – displays the menu to insert additional rows below/above an existing row or to insert additional columns before/after an existing column.

13   View Page Layout – toggles between **Page Layout** and **Normal** views of the current report.

14   View Structure/View Results – toggle between viewing the structure of the report and the results. **Structure View** allows you to make multiple modifications to reports and preview your modifications without implementing the changes on the WebIntelligence server. **Results View** implements the modifications and displays the values and formatting on the report tables and charts.

15   Drill – starts/ends Drill mode. You can analyze report values by drilling down or across the dimensions displayed in the tables and charts, to see more detailed slices of data.

16   Take Snapshot of Drilled Report – makes a duplicate of the drilled report allowing you to keep a copy of the drilled values in the same document.

17   Page navigation – click the arrows or type a page number in the box to navigate to specific pages in a document.
